

MAKING AN IMPACT IN SALEM!

Granite United Way works with nonprofit partners and businesses to ensure the needs in our community are addressed. Through our initiative, South Central Public Health Network, we collaborate with the Greater Salem community to identify key public health priorities and implement targeted solutions to improve overall well-being and safety.

Collaborating with the Salem Police Community Affairs Officer

to support the Communities Talk Initiative, promoting responsible messaging around alcohol use in local breweries and pizza shops throughout the region.

Supporting Local Organizations

like the Upper Room Family Resource Center, a Granite United Way funded partner, by providing their COMPASS program with overdose prevention powerpacks, socks, harm reduction supplies, and additional Narcan. Additionally, we connected the Upper Room with local businesses to host donation drives.

Reengaging the Stand Up Salem Coalition

a community-driven initiative advocating for a drug-free Salem, to promote alcohol awareness and responsibility.

Partnered with Community Organizations and Local Businesses

to distribute and install 30 Naloxboxes across the region, enhancing access to life-saving resources.

Distributed over 150 Narcan kits

equipping more individuals with the tools needed to respond effectively to opioid overdoses.
